Hva er spansk halsfeste ?

Gitarene merket med S har spansk halsfeste. Når man bygger etter "Spansk" metode, blir halsen laget først. Halsen og halsklossen er laget i ett sammenhengende stykke. Deretter blir lokk, sarger og bunn monteret del for del inn i halsen. Dette gir bedre stabilitet i halsskjøten og bedre overføring av lyd enn "dovetail" halsskjøt. "Dovetail"-skjøt er den vanligste halsskjøten på rimelige klassiske gitarer. Hals og kropp lages separat, og halsen felles inn i overklossen på kroppen.
